Email: anumishra55555@gmail.com | **Mobile:** +91 9125812318

Education

Kamla Nehru Institute of Technology

Bachelor of Technology in Electronics Engineering – CGPA: 8.68/10

Expected June 2027

Sultanpur, UP

Relevant Coursework

- Data Structures
- Algorithms
- OOP
- DBMS
- Software Engineering
- Computer Networks
- Operating Systems
- Machine Learning

Experience

Pinfinity Foundation

Aug 2025 – Sep 2025

Full Stack Developer Intern

Remote

- Designed a responsive and user-friendly interface using Material Tailwind Dashboard, enforcing JWT authentication to secure user data and restrict unauthorized access.
- Streamlined the deployment pipeline by configuring CI/CD workflows through GitHub Actions, reducing manual deployment effort and ensuring consistent cloud-based delivery.
- Collaborated within agile development teams to accelerate feature releases, shortening development cycles by **25%**.

Projects

ATSync (ongoing) | *FastAPI, React.js, Gemini AI, NLP, Pydantic* | [Live Demo](#)

- Architected an AI-powered ATS analyzer processing resumes against job descriptions via NLP-based keyword extraction, improving resume-match accuracy by **45%** in benchmark tests.
- Integrated Google Gemini AI to automate grammar analysis, interview question generation, and personalized cover letter creation, cutting manual effort by **60%**.
- Built FastAPI backend services with PDF parsing, Pydantic validation, and asynchronous AI workflows achieving response times under **300ms** in local load testing.
- Crafted an interactive React dashboard featuring analytics visualization and AI-driven optimization recommendations.

CodeSense AI | *Node.js, Express.js, React.js, REST APIs, Gemini AI*

- Created an AI-assisted code review platform generating automated improvement suggestions, reducing manual review workload by **40%**.
- Designed low-latency REST APIs and modular backend architecture serving requests under **250ms**, improving maintainability and scalability across services.
- Executed structured debugging and testing workflows, increasing platform reliability and response accuracy by **25%**.

Book Recommender System | *Python, Machine Learning, Pandas, Streamlit*

- Applied collaborative filtering on a publicly available dataset of **1M+** book ratings, generating personalized suggestions with a **30%** improvement in relevance over baseline model.
- Performed data preprocessing, feature engineering, and similarity-matrix optimization across **270,000+** book entries, reducing model inference time by **25%**.
- Deployed an interactive Streamlit interface delivering a complete end-to-end ML recommendation workflow.

Technical Skills

Languages: C, C++, Python, JavaScript

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Zustand

Backend: Node.js, Express.js, FastAPI, REST APIs, JWT Authentication

AI/ML: NLP, Google Gemini AI, Collaborative Filtering, Pandas, Streamlit

Databases & Tools: MongoDB, SQL, Git, GitHub, Docker

Certifications & Achievements

Oracle Foundations in AI

Certified in Machine Learning and Ethical AI

IBM Back-End Development Certificate

Node.js and Express Application Development

SheFi Season 14 Graduate

Blockchain and Web3 Technology Program

Smart India Hackathon

Qualified among 50+ teams for developing scalable technology-driven solutions
