Summary

Electronics Engineering undergraduate (CGPA 8.68) specializing in **AI/ML** — NLP, deep learning, and model training (PyTorch, scikit-learn). Built **LLM-integrated** applications with Google Gemini; seeking an **AI/ML Internship**.

Education

Kamla Nehru Institute of Technology

Bachelor of Technology in Electronics Engineering – CGPA: 8.68/10

Expected June 2027

Sultanpur, UP

Experience

HCL Technologies

June 2026 – Present

AI/ML Intern

Remote

- Built and trained a **PyTorch deep learning** model with custom loss functions and optimization strategies.
- Drove preprocessing and **feature engineering** (Python, Pandas, NumPy), evaluating across multiple metrics.
- Diagnosed performance bottlenecks and proposed empirically-backed architectural improvements.

Pinfinity Foundation

Aug 2025 – Sep 2025

Full Stack Developer Intern

Remote

- Built a responsive Material Tailwind dashboard with **JWT authentication**, securing user data across protected routes.
- Automated **CI/CD** deployment via GitHub Actions, eliminating manual releases and ensuring consistent cloud delivery.
- Partnered with an agile team to accelerate feature releases, shortening development cycles by **25%**.

Projects

ATSync (ongoing) | *FastAPI, React.js, Gemini AI, NLP, Pydantic* | [Live Demo](#)

[GitHub](#)

- Architected an **AI-powered ATS analyzer** scoring resumes against job descriptions via **NLP keyword extraction**, improving resume-match accuracy by **45%** in benchmark tests.
- Integrated **Google Gemini AI** to automate grammar analysis, interview-question generation, and personalized cover-letter creation, cutting manual effort by **60%**.
- Engineered **FastAPI** services with PDF parsing, Pydantic validation, and async AI workflows, achieving sub-**300ms** response times in local load testing.

CarVal | *Python, scikit-learn, Gradient Boosting, Pandas, Flask* | [Live Demo](#)

[GitHub](#)

- Trained a **GradientBoostingRegressor** (500 estimators, depth 5, lr 0.05) on **6,019** listings across **11** cities, achieving **$R^2 = 0.90$** on 10-fold cross-validation after cleaning raw mileage, engine, and power data.
- Engineered features (derived **car_age**, **kms_per_year**) and applied OneHotEncoding across **13** inputs; **81%** of held-out predictions fell within **Rs. 2L** of actual price.
- Deployed a **Flask** backend (4 API routes incl. auto-fill and market comparison) with a dark-themed live-price UI on Render, covering **30** brands and **1,800+** models.

CodeSense AI | *Node.js, Express.js, React.js, REST APIs, Gemini AI*

[GitHub](#)

- Developed an **AI-assisted code-review platform** generating automated improvement suggestions, reducing manual review workload by **40%**.
- Designed low-latency **REST APIs** and a modular backend serving requests under **250ms**, lifting reliability and response accuracy by **25%**.

Technical Skills

AI/ML: Machine Learning, Deep Learning, NLP, PyTorch, TensorFlow, Keras, scikit-learn, Neural Networks, Gradient Boosting, Feature Engineering, Pandas, NumPy, Google Gemini AI

Languages: Python, C++, C, JavaScript

Backend: FastAPI, Flask, Node.js, Express.js, REST APIs, JWT Authentication

Frontend: React.js, Tailwind CSS, HTML5, CSS3, Bootstrap, Zustand

Databases & Tools: MongoDB, SQL, Git, GitHub, Docker

CS Foundations: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Certifications & Achievements

Microsoft AI & ML Engineering Professional Certificate — supervised, unsupervised & deep learning; model deployment (MLOps) on Azure.

Oracle Foundations in AI — Machine Learning and Ethical AI.

IBM Back-End Development Certificate — Node.js and Express application development.

Smart India Hackathon — qualified among **50+** teams for building scalable, technology-driven solutions.
