Education

Kamla Nehru Institute of Technology

Bachelor of Technology in Electronics Engineering

Sultanpur, Uttar Pradesh

Expected 2027

- **CGPA:** 8.31 / 10

Technical Skills

- **Programming Languages:** Python, JavaScript (ES6+), C, C++
- **Backend Engineering:** Node.js, Express.js, RESTful APIs, OOP, Authentication (JWT)
- **Cloud & Infrastructure:** AWS (fundamentals), Kubernetes (fundamentals), Infrastructure-as-Code (Terraform – basic), Crossplane (familiarity)
- **DevOps & CI/CD:** GitHub Actions, CI/CD pipelines, GitOps principles (basic)
- **Databases:** MongoDB, MySQL
- **Version Control & APIs:** Git, GitHub, GitHub API, GitHub Apps (basic)
- **Testing & Debugging:** Unit testing, API testing, Validation strategies, System debugging
- **Software Engineering:** Data Structures, Algorithms, Distributed Systems basics, Problem Solving

Experience

Pinfity Foundation

Full Stack Developer

Remote

Aug 2025 – Dec 2025

- Built and maintained production-ready web applications using **Node.js, Express.js, React, and MongoDB**, delivering scalable and secure features aligned with organizational needs.
- Created RESTful APIs and backend services that improved response times by **30%** and supported reliable data exchange.
- Implemented JWT-based authentication and access control to safeguard user data and system operations.
- Worked closely with designers and stakeholders to ship features faster, reducing development cycles by **25%**.

Technical Projects

CodeSense AI | Node.js, Express.js, React, REST APIs, AI Logic

- Developed CodeSense AI, a full-stack code review platform that analyzes user-submitted source code and generates AI-driven improvement suggestions, reducing manual review effort by **40%**.
- Designed and implemented RESTful APIs for code submission, processing, and result delivery, achieving low-latency responses (< 300ms) and scalable request handling.
- Applied modular and clean architecture principles, improving maintainability and enabling faster feature additions by **30%**.
- Executed structured testing and debugging workflows, increasing system reliability and output accuracy by **25%**.

PulseChat | Node.js, Socket.IO, WebSockets, MongoDB

- Built PulseChat, a real-time messaging platform supporting concurrent multi-user communication using Socket.IO and WebSockets.
- Implemented room-based chat, live user presence, and instant message delivery, reducing message latency by **35%**.
- Integrated MongoDB for persistent message storage and optimized retrieval, improving chat history load times by **40%**.
- Debugged synchronization and real-time data flow issues, ensuring stable performance under high message throughput.

SmartRoute AI | Node.js, Express.js, MongoDB, JWT, AI Workflows

- Built an AI-driven ticket management platform that auto-classifies and routes requests, cutting manual triage by **50%**.
- Designed asynchronous backend workflows and lifecycle handling, improving resolution speed by **30%**.
- Applied JWT-based RBAC and stress-tested workflows to ensure secure and stable performance.

Certifications

- **IBM** — Developing Back-End Apps with Node.js and Express (Coursera) | **Oracle** Foundations in AI (Machine Learning & Ethical AI) | **SheFi** Season 14 Graduate | **Smart India Hackathon** Finalist
